ARE YOU SEARCHING FOR A GREAT CAREER?

Take your first step towards an interesting career! The Entrypark International Career Book is your guide to leading international employers from different industries. By reading it, you will learn who recruits, who has interesting graduate opportunities, and how you can access these opportunities.

At Entrypark, we are recent graduates too. We know how ambitious and hard working students are today. We all have dreams, want to make a difference, and discover an employer that gets us started on the right career path. As students, however, we are simply not aware of all the opportunities that are out there.

To help students “discover and be discovered” is Entrypark’s mission. Helping students, employers, and universities to discover each other and match aspirations with opportunities is what we do. We invite you to go online to www.entrypark.com and tell us about yourself, your education, and your dreams. Then we will match you with employers who are looking for students like you. This way, you will both discover and be discovered by employers!

Find additional information about the employers, universities, and career opportunities online at www.entrypark.com.

NETWORKING HABITS

-what's not & what's hot

Networking is a year round activity so it's always a good time to revisit your networking strategies. You might have developed bad habits that you need to adjust.

BAD HABIT: THINKING YOU NEED TO MEET MORE PEOPLE

ALTERNATIVE: YOU ALREADY KNOW THE RIGHT PEOPLE

When people think of networking contacts, they think of people who are **ABLE** to help – connected, influential, the decision-maker who can sign off on your career promotion or big project for your business. You might fall into the trap of seeking out people who seem more powerful than the ones you already know.

While it's true that knowing powerful people helps, you shouldn't dismiss the people already in your network who already are **WILLING**

to help. Even if it doesn't seem like your network is able to help, you don't know who or what people know. An existing contact may not be the decision-maker, but may know the decision-maker. Or she may know a key influencer to the decision-maker. Or she may know something about the company that will enable you to pitch yourself more effectively. Focus on tapping into the network you already have, rather than chasing after more and more new people.

BAD HABIT: FOCUSING TOO MUCH ON YOUR PITCH

ALTERNATIVE: NETWORKING IS NOT ABOUT WHAT YOU SAY; IT'S ABOUT WHAT YOU HEAR.

Of course, it's important to have a memorable, concise, and compelling networking pitch. What you say is indeed important. However, it's more important that you hear what other people say. When you really listen, you are able to follow up effectively and develop a genuine relationship.

Networking is about following up in a way that is generous (i.e., focused on the other person). You won't know how to be generous in your follow-up if you're not listening for what people really care about and need. As a bonus, people so rarely listen that you will distinguish yourself if you listen well.

BAD HABIT: NOT IMPOSING ON YOUR NETWORK

ALTERNATIVE: WHILE NETWORKING IS NOT ABOUT QUID PRO QUO, YOU STILL HAVE TO KEEP SCORE.

I'm not suggesting you impose on your network in an overbearing way! I'm also not contradicting what I said about the importance of generosity in Point #2. The best networking is about paying it forward, but you still need to keep a general score. You focus on being generous, knowing that even if that particular person doesn't reciprocate, the broader network will reciprocate in some way. This means you need to look at your total networking activity and what it brings. If you feel like you're always the one giving and you haven't been getting anything back – any leads, any referrals, any information – then you need to look at whether your network is just full of takers, or maybe you aren't being clear about how people can help you

or not asking at all. Not all networking groups will be appropriate for you and your professional goals. You need to track your results and refine your activities as needed. Quid pro quo networking is a short-term transactional approach: you scratch my back, and I scratch yours. It's rare that each person in a 2-party exchange will have exactly the same magnitude of need as the other and will be able to make a 100% equal trade. This is why quid pro quo is unrealistic, inefficient and ineffective – someone will end up feeling short-changed. But in a broader network, you must give and TAKE. If you aren't benefiting in some way from your network, it's the wrong network.

Engineers -

TURN YOUR PROBLEM SOLVING ABILITY ONTO YOUR JOB SEARCH

One of the best majors you can have in today's job market is, without question, engineering.

According to Forbes list of the top majors, engineers are at the very top.

But engineering majors, don't get too overconfident because your major isn't everything. The best jobs go to the candidates that have the best job search skills in addition to the best major.

SO WHAT IS AN ENGINEERING MAJOR TO DO?

**Focus on the fundamentals;
there are six of them!**

1

IDENTIFY YOUR TARGET: what is the industry, the function and the geography of your search. Casting a wide net is great for fishing, bad for the job search. No company ever wanted to hire someone who said that they want to or can do a little bit of everything. The more specific you are, the more likely you are to get the best job out there.

2

CREATE YOUR MARKETING CAMPAIGN: which includes 4 things:

- Resume: make sure it shows your value
- Cover Letter: make sure you make a case for meeting and interviewing you
- Pitch: Be ready to introduce yourself in a way that will differentiate you from the competition
- LinkedIn Profile: complete your profile including a professional photo of you smiling!

3

RESEARCH: here is where you will shine... research the company, the industry, the opportunity. Use your network to get first hand info about the opportunity to put you ahead of the other hundreds of engineers trying to get that job.

4

NETWORKING & INTERVIEWING: engineers excel at math and science, but may be lacking in these soft skills. The more you network, the more you'll interview, so study up on the best strategies here.

5

TROUBLESHOOT: when things go wrong and they often do, find out what the problem was so you don't waste time dealing with it again.

6

NEGOTIATE AND CLOSE THE OFFER. 99% of recruiters want to hire the most enthusiastic person who really wants the job. Once you have that job offer, you can easily negotiate.

Meet Jérémie Steinberg

The winner of the last
Potentialpark OTaC Survey

- What did you do to win the newest iPad?

I simply answered a survey about Online Recruitment directed by Potentialpark.

- What do you think about the survey?

The survey was smart and well thought. It tackles the very issues both recruiters and students are faced with nowadays.

- Why did you fill in the survey?

As a young business student, I was glad I could express my opinion about how recruiters should address us. The Internet has completely changed the way we communicate. It is important recruiters follow up.

- Will you complete the survey again this year?

If it can help change human resources' policies. I will definitely complete the survey again this year.

Your voice matters

Let employers hear it! Be part of the
Potentialpark OTaC Survey 2014

You can get 12 issues of Bloomberg Businessweek for \$4.99 or a chance to win the latest iPad/iPhone based on the quality of your response.

Go to:

survey.potentialpark.com/s3/OTaC2014

REMINDERS FOR YOUR CV AND CL

1. EXPERIENCE

Watch out for the gaps in your experience. Employers will most likely want to know the reasons why, for example, you have neither worked nor studied for a certain period of time. Make sure that you don't have too many "empty periods" in your CV. And if you have been unemployed for a big period of time (anything over 3 months) think about what you actually did during that time. Some experience was surely gained. Maybe you did babysitting or worked as consultant or helped out your father with his company, or gave Polish conversation classes to Erasmus students... You may think that employers don't care but they really care even about small and creative activities. What they don't like is to find blank periods of time with no activities, for no valid reason or with no experience gained.

2. WORDS

Make your cover letter fit. Use words they used in the job offer and focus on what they are looking for. Show them that you are the perfect candidate

3. KEYWORDS

Use keywords. Some CVs are, at a first stage, scanned by electronic systems. Therefore, if, for example, you are applying for a marketing position, be sure that the word "marketing" when you describe your experience in that field.

4. TASKS

Describe the work you have been doing on each position: not only the job title but also the tasks you have been doing.

5. STATEMENTS

Underline your most important statements. Give examples like: I consider myself a team player as I have worked 2 years in an international team in which I did

6. TRANSLATE

If you can, translate your CV in the language of the country you are applying to, especially if it's a country with a strong local language, such as Italy or France, or a country which appreciates when students do some efforts to learn the language

What if I HATE my job?

GRADUATES ARE TAUGHT THEY SHOULD APPRECIATE ANY JOB THAT THEY GET, BUT WHAT IF THE ROLE IS REALLY UNSUITABLE?
WHAT TO DO IF YOU ARE STUCK IN A SIMILAR SITUATION.

Every week (or so it seems) newspapers are describing the struggle of reams of graduates to find a job. By now we're all familiar with the gloomy scene – new graduates fight tooth and nail for every position, job centres are brimming with disillusioned ex-students and, if forecasts are to be believed, the economy will get worse before it gets better. So what happens if, despite the miserable backdrop, you're lucky enough to land a job?

Great news! Unless of course it's a job you don't enjoy. So what should you do? Grin and bear it, or cut your losses and run?

Perhaps unsurprisingly, since the economic downturn, job dissatisfaction has been on the rise. Cuts, decreased promotion prospects and increased workloads are making more of us unhappy at work than ever. But what options are available for an unhappy employee?

According to Bruce Woodcock, the primary career advisor at the University of Kent, the sector you belong to has a huge impact on the options available to you. For instance, in jobs where professional accreditation is required, the possibility for change is generally less than in other careers. If you're a lawyer, for instance, you'd be hard pressed to switch to accounting without significant retraining, which means investing a lot of time and money. However, you might be able to make a 'diagonal move' into a role that's more suitable for you. For example, both lawyers and

accountants could become chartered secretaries, a position which combines both sets of expertise. The majority of careers however are less specialised than law or accounting, and most degrees lend themselves to a large variety of job options. Using the increasingly popular media as an example, Bruce described how a graduate may begin a career in advertising, but will often move into marketing or PR at a later time. Whatever the sector, Bruce believes there are three essential elements for job satisfaction: autonomy (having control over your own work), mastery (using a skill to a high level) and purpose (making a difference). The good news is that it's possible to improve each of these both in the workplace and out of it.

"Adults spend out a third of their waking hours at work, so it's essential to find an occupation that makes you tick."

ONE WAY TO MAKE A POSITIVE CHANGE IS TO IDENTIFY AREAS OF YOUR ROLE THAT YOU DO ENJOY, AND FOCUS ON MAKING THEM A MORE FUNDAMENTAL PART OF YOUR JOB – BY TAKING A SHORT TRAINING COURSE TO STRENGTHEN EXISTING SKILLS, FOR EXAMPLE.

ANOTHER KEY PLAYER IN TERMS OF WORKPLACE HAPPINESS IS HAVING A SENSE OF PURPOSE. THIS MIGHT BE ACHIEVED BY HAVING A JOB WHOSE DEMANDS CLOSELY MATCH THE THINGS YOU'RE GOOD AT. IT MIGHT ALSO BE ACHIEVED BY SWITCHING TO THE NOT-FOR-PROFIT SECTOR – DOING THE SAME ROLE FOR A CHARITY, FOR EXAMPLE, RATHER THAN A LARGE CORPORATION WHERE PROFIT IS THE MAIN MOTIVATION.

LAST BUT NOT LEAST, COMMUTING TIMES HAVE BEEN SHOWN TO HAVE A NEGATIVE EFFECT ON JOB SATISFACTION. MOVING CLOSER TO WORK OR APPLYING FOR POSITIONS IN YOUR LOCAL AREA CAN MAKE A DIFFERENCE AND GIVE THE OPTION OF WALKING OR CYCLING TO WORK.

The upshot is that if you hate your job, it may be easier than you think to change your circumstances. Adults spend out a third of their waking hours at work, so it's essential to find an occupation that makes you tick. **Changing your job might mean tailoring your role to encompass more of the things you enjoy.** It might mean reducing the hours you

spend travelling to work, or it could mean a new start altogether. Many degrees are broad enough in scope to lend themselves to many different sectors, and even the most specialised careers offer the possibility for sector related movement and the chance to get stuck into a different or more appropriate role. ■

WHAT SHOULD I DO?

Everybody knows finding a job you can turn into a career is easier said than done, even if you have all the qualifications you need. So can it be that the answer is to match your career to your personality?

"IF TODAY WERE THE LAST DAY OF YOUR LIFE, WOULD YOU WANT TO DO WHAT YOU ARE ABOUT TO DO TODAY?"
STEVE JOBS

Personality types' were defined and discovered by psychologist Carl Jung and Isabel Myers-Briggs before World War 2.

Since that initial breakthrough, it's often been said that matching your personality type to your career can help you become happier in everything you do. With a little help from Staffordshire University's careers advisors Jill Freeman, we have devised a quiz to help you discover what you could do when you're overwhelmed by the options.

WOULD YOU DESCRIBE YOURSELF AS:

1. A people person
2. An 'ideas' person
3. An action person
4. A risk taker
5. A focused person
6. An observant person
7. A logical person

WHEN AT WORK DO YOU:

1. Always take your responsibilities very seriously
2. Understand ideas quickly
3. Become passionate about projects quickly
4. Love work being an adventure
5. Hate planning – you often leap before you look
6. Love systems and routines
7. Always trying to understand theories before applying them

IN THE OFFICE YOU ARE:

1. A valued team member who always completes tasks
2. Always enthusiastic about projects but pass the work on to others
3. The motivator – when excited about a project, keep the team spirit up
4. Always dealing with the situation here and now, often spontaneously
5. At front of house, charming customers with your knack for words
6. The leader of the team, sorting out problems quickly
7. Shy when dealing with new customers, clients or team members

WHEN WORKING IN A GROUP, YOU ARE:

1. Energetic and eager to join in
2. Keen to debate issues with others before making a decision
3. Adept at performing lots of different tasks not so good at mundane ones
4. Able to find solutions quickly but happiest working alone
5. The brains behind the creative ideas and always the one to present the work
6. Eager to take the lead and encourage others in the group
7. Good at analysing problems in a new way by using knowledge and facts

IN YOUR FREE TIME, WHAT DO YOU ENJOY MOST?:

1. Spending time with other people, giving practical care when it is needed
2. Reading up on strange facts so you can demonstrate your knowledge to your friends
3. Spending time alone or with close family and friends
4. High-adrenaline activities such as sky diving, motorcycling, or skiing
5. Doing whatever the day brings, completely spontaneously
6. Spending time in an office, shed or study brainstorming your next project or inventing something wacky
7. Daydreaming of new ideas or spending time in deep conversation with like-minded individuals

YOUR PERSONALITY TYPE!

MOSTLY ONES: THE CARE GIVER

You love people and are always interested in others. You are energetic and always take your responsibilities very seriously. You are a very kind and giving person who wants to be appreciated for who you are. You are a good team member and will always follow tasks through to completion. You should consider a career in nursing, social work or childcare.

MOSTLY TWOS: THE VISIONARY

You are a very intuitive person, which helps you understand and absorb ideas quickly and with depth. You are full of ideas, see possibilities everywhere and get enthusiastic about projects immediately. However, you find it hard to follow an idea through once it has started. You love to verbally spar and debate issues with others. You value having knowledge and always seek to have a potentially better understanding of the world. You dislike routine and need personal freedom / flexibility to be happy. You could consider a career in law, sales or marketing.

MOSTLY THREES: THE INSPIRER

You are a very bright and a warm enthusiastic person. You become very passionate about possibilities and are very project oriented. You love life and strive to get everything you can out of it. You can work alone very well but need to have focus and be excited about a project – you do not like performing mundane and boring tasks. You have great people skills and can understand someone in a very short space of time. Inspirers should consider a career in psychology, journalism or science.

MOSTLY FOURS: THE MECHANIC

You thrive on action and love an adventure. You are independent and don't like following regulations. You like to spend time alone – this is the best time for you to get things clear in your head and make decisions. However, sitting behind a desk and planning long-term is not for you as you are spontaneous and deal with the here and now. You love high-adrenaline activities such as skydiving and motorcycling. You are generally introverted (shy) but also optimistic, loyal and trusting. You are suited to logical tasks and can find solutions quickly to these. The Mechanic should consider a career in police or detective work, engineering / mechanics or computer programming.

MOSTLY FIVES: THE DO-ER

You are a risk-taker and live in a world of action. You have a flair for drama and style and are good at improvising and storytelling. You are practical, observant and spontaneous and hold your own values close to your heart. You are outgoing and not afraid to get your hands dirty. You are a very fun person to be around. You could consider a career with the emergency services, in marketing / sales or become an entrepreneur.

MOSTLY SIXES: THE SCIENTIST

You love observing the world and planning all your ideas systematically. You are a natural leader because you can use objectivity to oversee the group. You have little interest in other people's feelings. You are very ambitious and will always strive to meet your goals. You could consider a career in science, engineering, business administration or the military.

MOSTLY SEVENS: THE THINKER

You love to theorise and will always try to turn problems into logical explanations. You value knowledge highly and are always generating your own theories. You are bright and capable but don't like routine. You are introverted and don't like to control or lead people. You are tolerant and flexible, can be shy but are confident around familiar people. You could consider a career in maths, as a university lecturer or in forensic research.

WHY WORK FOR US?

Could you create the next breakthrough material? Help aeroplanes fly further with less fuel? Bring clean drinking water to more people? These are just some of the things that SABIC people have helped achieve.

If you're excited by the possibilities of science, SABIC is the place where you can turn them into reality.

We're looking for people with vision, drive and ingenuity. People who can be part of SABIC's journey to become the world's preferred leader in chemicals.

We aim to be a partner in your professional and personal development, giving you every chance to build a challenging and satisfying career that maximizes your existing strengths while unlocking others that you never knew you had.

ENTRY OPTIONS

- Internships 
- Graduate Programs 
- Thesis Work 
- Direct Entry

WHY WORK FOR US?

Your Future with ThyssenKrupp: Those who dream big have come to the right place: Tomorrow's technologies for today's challenges. Even the greatest innovations begin on a humble, blank piece of paper. Fill it with your ideas! Be at "the right place." Play an important role in a team that breaks new ground as a single unit. Good is not good enough for us. That's why we deliver more than outstanding performance; we also place a high priority on employee development. Our roots go deep and ThyssenKrupp just keeps on growing. Why not grow with us? Reach the summit with an outstanding partner. Start your ascent and take the first step by submitting your application.

- Thesis Work 
- Direct Entry 

OUR CULTURE

- Having good relationships with superiors
- Having good relationships with colleagues
- Team-oriented environment
- Competitive & challenging environment
- Creative / innovative environment
- Chance to take responsibility early on
- Chance to learn and develop personally
- Company is international

To visit us online go to:
entrypark.com/thyssenkrupp

HOW TO APPLY

The entire application process - starting with the first contact up to the hopefully positive response for you - takes around 4 to 6 weeks. Of course you will receive a confirmation of receipt for an online application within minutes.

Got the right chemistry? Become one of us.

Like Maria del Pozo Gomez, process technology engineer at ThyssenKrupp Uhde GmbH – our chemical plant and refinery specialists. As one of us, she is responsible for planning and commissioning chlorine production plants and her work takes her all over the world. If you want to be in charge of international projects one day, become one of us.

valeo added

WHY WORK FOR US?

Valeo is an independent Group, fully focused on the design, production and sale of components, integrated systems and modules for the automotive industry, mainly for the reduction of CO2 emissions. To serve its customers around the world and fulfill their requirements most effectively, Valeo operates in 28 countries and works closely with the major global automakers on all their markets.

Valeo pursues long-term HR policies through management development, training and internal mobility. Therefore, we are looking for candidates who wish to develop their careers with us, three prerequisites are essential: will to progress without being career driven only and to broaden the scope of competences, language skills (proficiency in English), geographical mobility. Join us !
